Action Plan#	Program	Organization	Description	Target Audience	Goal/Outcome	Annual Funding Available- \$305,000/Allocated	One-Time Cost	On-Going/ Annual Cost
#1	Community Recovery Peer Based Support for long term recovery of Substance Use Disorder SUD afflicted individuals	Catholic Charities of Southeast Michigan & Recovery Advocacy Warriors	Recovery Advocacy Warriors (RAW) is a Recovery Community Organization. The action plan will coordinate & organize community based events & educational workshops. Events to be performed quarterly. Leverage existing RAW funding with resources provided under this plan.	Individuals with substance Use Disorder (SUD) seeking or sustaining recovery	Provide coordination of services within community connecting individuals to resources for sustaining long-term recovery outcomes	Annual Funding: \$10,000	\$ -	\$ 10,000
OSP Exhibit E			Strategy #9					
#2	Intensive Outpatient (IOP) Substance Abuse Program	Partnership with Salvation Army Harbor Light & Monroe County Community Mental Health Authority to provide/fund clinical staff	Schedule B (C) 15 For this action plan, Salvation Army Harbor Light will provide clinical staff to treat individuals within the Monroe Jail and while transitioning out of the jail. A focus will be on those with misdemeanor offenses. Currently only intensive outpatient programs exist for male felony offenders. In 2023, Monroe Community Corrections estimates 30 people with misdemeanors will be eligible. Program would fill an identified gap in our community and would help community members find recovery and reduce recidivism. The identified problem is when individuals come to the Monroe County Jail with Opioid Use Disorders (OUD), and other Substance Use Disorders (SUD), with misdemeanor offenses, or pending felony offenses in which they undergo a lengthy 4-6 month court process only for their felony case to be pled down to a misdemeanor case and then subsequently released with no treatment. Program will also focus on coordinating services between a Clinical Case Manager at MCCMHA and the SAHL Clinical staff to serve individuals connected through Monroe Veteran's Affairs Office at the Bedford Veteran's Center & Veteran's Outreach referred from Ann Arbor VA to Monroe Veterans. Monroe Veteran's Court & Jail Diversion will make cross referrals & include the PIHP to access available resources that include a full time Veteran's Navigator & Peer Support Specialist who can help Veteran and their families for SUD & MH. Under the plan, SAHL will provide a clinical to implement IOP services & CMH will provide a clinical case manager who will act as the IOP Boundary Spanner focusing on successful re-entry into the community and include supporting services at these additional facilities beyond the jail: - Paula's House - Oaks Village - Philadelphia House - Oaks Village - Little Blessings MCMHA will provide a clinical case manager to focus on successful re-entry efforts. This has been a focus of other jail diversion efforts & is important to help address basic needs of individuals so they can concentrate on the treatmen	Individuals with opioid use disorder & co-occurring SUD/mental health disorder with little criminal history. Individuals in jail & the same persons upon release. Based on data from New England Journal of Medicine, death from overdose is 129 times more likely within two (2) weeks of release from incarceration v. the general population occurrence rate.	Participants will complete 9 hours/week of evidence based SUD treatment. Completion of the program and progress thru treatment activities toward sustained recovery from SUD. Provide proactive programs & services to those in community afflicted. Provide community education to reduce stigma of SUD, promote distribution of Narcan & use of safe syringe program. Use of supply costs to further support existing safe syringe program (SSP). The goal is to create a program through community partnerships that will work to be proactive in its approach to implement treatment early, rather than waiting for someone to receive a felony to intervene. Create re-entry plans for all eligible individuals, transportation from jail release or to IOP appointments, assess & connect to mental health as needed & coordinate with jail medical, primary care physician, MAT prescriber & psychiatrist to ensure continuity of medications from jail into community.	\$84,500 clinical staff \$10,000 supplies \$1,300 travel \$8,680 support services \$1,600 technology Total Annual: \$106,080 Funding to SAHL for one (1) clinician \$100,000 IOP Boundary Spanner \$5,000 Transportation \$360 Technology \$2,000 Training \$10,000 Supplies Adm \$10,936 (10%) Total Annual: \$128,296 Funding to MCCMHA for one (1) clinical case manager One time - Vehicle \$35,000 Technology \$1,500 Total One Time \$36,500	\$36,500	\$234,376

#3	Engagement Center/Facility alternative to hospital admittance or incarceration	St. Joseph Center of Hope	Action plan is based on following evidence-based Recovery Oriented Systems of Care philosophy. It assesses all individuals in the Stages of Change model. This plan utilizes a variety of techniques & interventions to match individual stages of change to appropriate services & referrals. Individuals are monitored by peer support specialist for up to 23 hours. Goal will be transitioning to the appropriate treatment facility.	Individuals suffering from substance use disorder & mental health crisis. Connect & support them into treatment and resources to reduce the number of overdoses in the Community. Also, increase Naloxone distributions & distribute fentanyl strips, provide HIV/HEP screening, testing & treatment options/referrals. As applicable, refer individuals to wound care treatment and other service providers.	Annually support 1,000 admissions to 400 unduplicated individuals. Connect and provide transportation to 500 admissions to treatment and/or recovery resources. Have minimum of 6 staff certified in CAN thru Monroe County Community College.	Annual Funding: \$20,000	\$ -	\$ 20,000

Additional Clarifying Plan of Action Notes:

As outlined in the Jail Diversion Services breakdown, clinical positions are currently sustained or have some plans or means of sustainability. This is due in part to prior outcomes and community partners recognizing the important work and stepping up to assist in funding. What our current plans are lacking is funding for a population that comes and goes from the jail in a short-term stay or pass by programs are they have been charged with misdemeanors and do not meet eligibility for services or interventions or attempts to prevent further incarcerations. This program builds on that unmet need and constructs a community collaborative to fill that gap, to be more preventative rather than reactive.

SAHL will provide the clinician to implement the Intensive Outpatient Substance Abuse Program (IOP) services, and Monroe Community Mental Health Authority (MCMHA) will provide a Clinical Case Manager that we identify as the "IOP Boundary Spanner" to focus on successful re-entry into the community for this specific population. This critical role of re-entry has been a focus of MCMHA in our overall Jail Diversion efforts and we understand its importance. A treatment modality is only as good as the level of participation of those receiving the service. Through the IOP Boundary Spanner, we can ensure all the individual's basic needs are met within the community so the individual can focus on the treatment they need for success.

Critical Roles of the MCMHA IOP Boundary Spanner:

- *Create a re-entry plan for all individuals eligible for the proposed IOP program
- *Provide coordination of any basic needs identified, food, housing, clothing, Medicaid, employment, etc.
- *Provide transportation when necessary either from jail release, or to IOP appointments.
- *Assess additional needed services such as mental health services and get them connected if appropriate
- *Coordinate with Jail Medical, Primary Care Physician, Medication Assisted Treatment prescriber (if applicable), and Psychiatrist (if applicable), to ensure continuity of medications from jail into the community
- *Ensure Crisis and/or Safety plans are in place for all participants to assist with their safety in the community
- *Provide community education to work on reducing the stigma of SUD and promote the distribution of Narcan and use of the Safe Syringe Program
- *Distribute Recovery Backpacks to ensure higher likelihood of continued recovery
